## ImagePilot LE – acquisition-focused, all-in-one

The All-In-One digital radiography solution configured for private practice healthcare providers that will utilize an existing or alternate PACS for image archival but desire the simplicity of ImagePilot for image acquisition.

### Standard ImagePilot Features:

- All-In-One Design—Easiest for the staff to learn. Reduces IT support requirements.
- AutoPilot—Automatic image processing for unsurpassed consistency in image quality.
- Simplified Image Acquisition—Single click workflow increases productivity.
- Same User Interface At Every Workstation—learn only one system.
- Easy-To-Use And Feature Rich Viewing Screen—Image adjustments, annotations, measurements, inputs and outputs, customizable for basic to advanced users.

### ImagePilot LE highlights:

- Excellent Speed—60 cassettes per hour upgradable to 76.
- Smaller Workstation Footprint—Desktop configuration suited for integration with centralized PACS.
- Local Short Term Storage—250GB hard drive.
- Worklist Toolkit—Improve workflow and connectivity with external systems. Includes DICOM Modality Worklist and Study Mapping.
- Simultaneous Viewing—One additional client license (2 total inc. the server).
- Export Patient Images To CD—Better than film for transportability and viewing.
